

Are you an entrepreneur in forest fire prevention and extinction, forest management or adaptation and mitigation to climate change?

Join CILIFO's Firefighting Open Innovation Lab and we will support your most innovative initiatives.

If you are interested, you can contact the Finnova Foundation and let us know about your innovative technological solution.

➞ andalucia@finnova.eu

CILIFO's Firefighting Open Innovation Lab offers:

1. A workspace in the CILIFO Centre, in Seville/Huelva (Spain), where you can network within a Public-Private Partnership.
2. The possibility to test innovative technologies in a real environment through pilot tests.
3. Online and face-to-face advice, through specialized mentors to look for European funding, with the aim of bringing innovative products, processes and projects to market.
4. Support to develop an innovative idea in a European project.
5. Advise in the search for international partners for the replication and exploitation of results.
6. Legal support to start-ups in the field of legislation and fighting against legal barriers, internationalization, mentoring and training in European funding.

The CILIFO project financed by the Interreg POCTEP programme (2014-2020), through its Firefighting Open Innovation Lab, supports the initiatives of entrepreneurs and companies in the prevention and fighting against forest fires.
